

BAR**KING LIKE A DOG**

SAMPLE SCRIPT

It should be noted that while I played into Brian's idea of barking like a dog, this sample script could easily be made to fit any animal for any type of verbal response. Even if you're volunteers don't directly feed you ideas like Brian did here for me, feel free to be creative while remaining appropriate.

“In a moment, when you wake up, you don't know how to respond to anything in any other form than a bark. You are your spirit animal at heart, you are a dog. Almost like a husky wolf dog. To you it seems like you're speaking English anytime you respond to anything, even though everyone else can clearly hear you barking. You simply bark out all your answers. When you open your eyes in a moment, this will become your reality and it will feel normal... natural... so you won't question it”
